Doing IT Different

Main Workflow

1. Client contacts us and sends web design detail requirements to us.

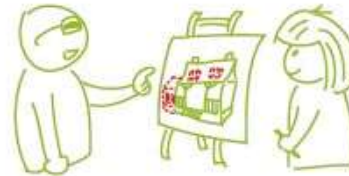

2. Based on client's requirements, we make a web design plan and quotation document.

3. Sign contract and get paid.

4. Our graphical designer start to design, one homepage and one sub page first.

5. For the draft design client sends some feedback comments to our designer.

Unexpected : If client feel not happy to our draft designs after 3 times big updates by our graphical designer, then client has rights to request all his money back. Contract is cancelled.

6. Draft designs (one home page and one sub page) are confirmed by client.

7. Our graphical designer moves forward to work on more sub page designs.

8. All sub pages are confirmed by client.

Main Workflow

9. Our HTML designer starts to make HTML web pages based on confirmed designs.

10. Next step our programmer will integrate program functions in web pages.

11. Website is completed.

12. Website is under testing.

13. Website is launched online.

14. We will supply one year fee website maintenance service to ensure website runs well. (Only small updates.)
